

I have received info that K-Love may be "downgraded" to a LPFM station. If that happens, I am concerned that reception will not be available in my area. This is a station that is very important to the public, and is widely listened to in my area. K-Love provides many public service announcements and information about activities available to the public in our area. Please keep K-Love as an FM station, so I can continue to listen daily with clear reception. Thank you for your assistance. Susan Fox
